Nevada Mining Bibliography – (UNR DeLaMare Library)

- The Comstock: An Economic History of a Mining Bonanza, 1860-1885 (Dr. Richard Garner, Economic History Data Desk)

- UNR Mines Library Vertical File – searchable index – (UNR DeLaMare Library)
- Mining Manuscript Collections (UNR Special Collections)
- Comstock Mines Manuscript Collections (UNR Special Collections
- Lady in Boomtown by Marjorie Brown
- Mining History and Equipment (UNR W.M. Keck Museum)
- Howard Hickson's Histories
- The Nevada Observer Reading Room - Scanned, historic documents related to Nevada history,
  including state and county histories, travel narratives, literature, and the U.S. Senate Kefauver Crime Committee
  reports.
- Mining Publication Index (Nevada Bureau of Mines and Geology) This list of more than 5,200 references includes NBMG publications, other publications by NBMG staff, publications cited in NBMG publications, and numerous other publications and theses related to Nevada geology culled from GeoRef and other sources.
- Mining District Files database (Nevada Bureau of Mines and Geology). The Mining District Files consist largely of historical and current maps, reports, articles, photographs, correspondence, databases, etc. on all aspects of mining in Nevada. These have largely been donated to the NBMG over the years from individuals, companies, and other government agencies. Items that have been scanned and converted to Acrobat PDF file format are live linked to the document title. Clicking on the title will down load the PDF file, however many of these files are large (1 to 5 or more megabytes in size) so you should be on a high-speed connection if you wish to view the scanned version of the documents. The scanning program is ongoing.
